Development of “Pritto Bait”

In the past, TOKAI RIKA struggled with malfunctions caused by ants entering vehicle interior components.

We developed a grease that repels ants, we decided it would be best agricultural use.

“Pritto Bait” is a bait product designed to kill Argentine ants, developed using ant-repellent grease technology.

And, we tested and developed Pritto Bait though on sites and hands-on research.

ぷりっとベイト
アルゼンチンアリ用 誘引殺虫剤

Pritto Bait eliminates Argentine Ants

Grease Type

Naturally derived ingredients

Oil：animal fat

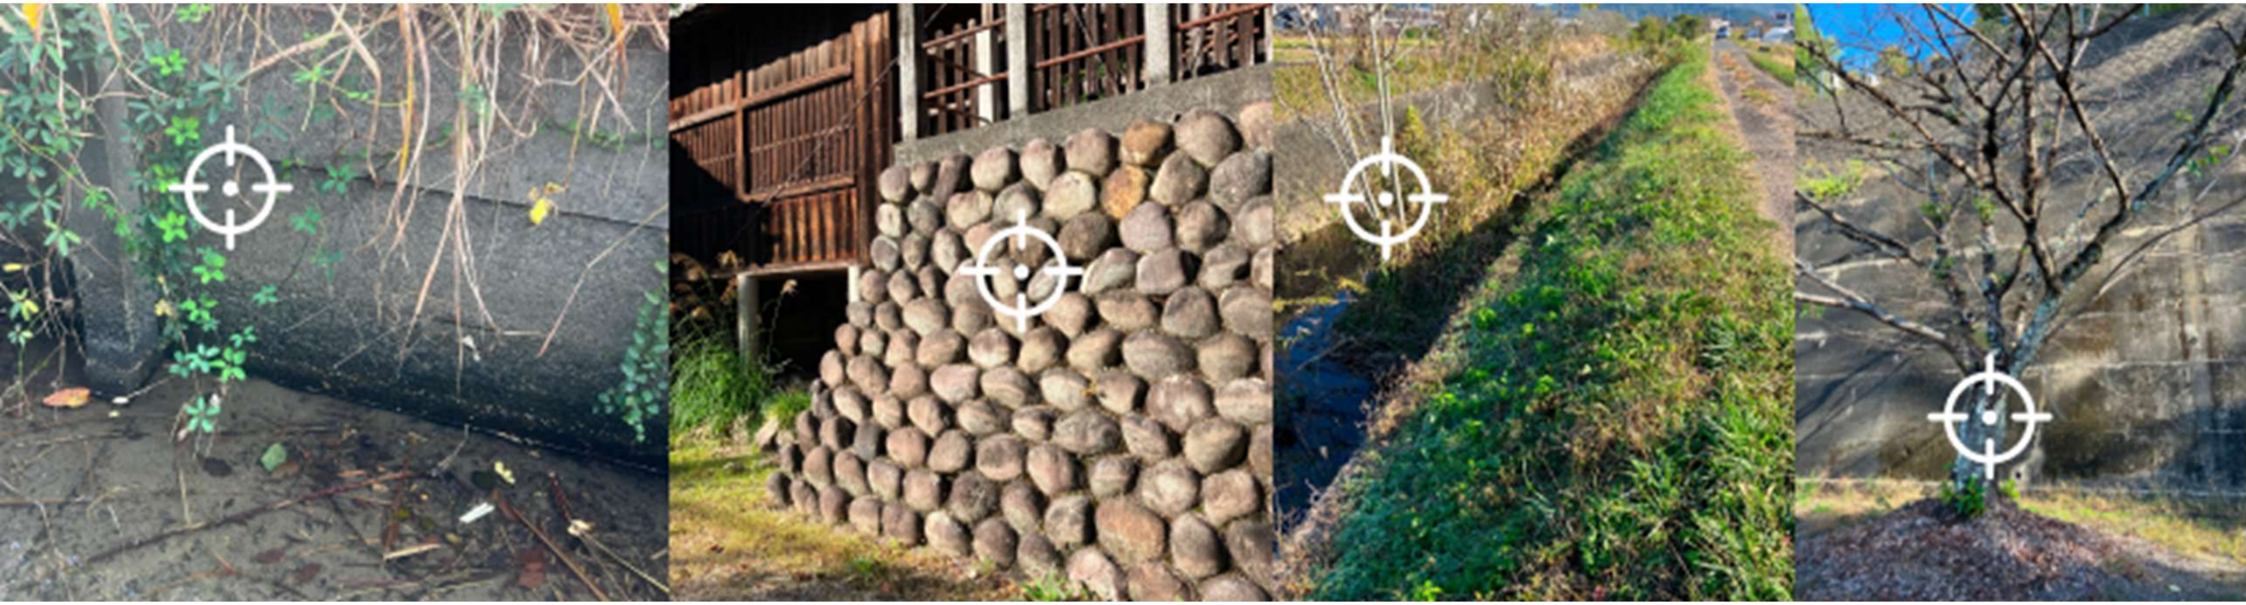
Attractant：black soldier fly larvae

Active ingredient

Fipronil

Pritto Bait

Key feature 1



Pritto Bait can be used anywhere and doesn’t need to be reapplied.

It can be applied on vertical surfaces as well as flat surfaces.

Pritto Bait

Key feature 2

Pritto Bait can be used in any weather and at any time.

It’s a grease made of oil so,

- **It repels water and it can be used even in rainy weather.**
- **It stays where you apply it and it won’t blow away in the wind.**

Pritto Bait

Key feature 3

Pritto Bait reduces work time.

You don’t need to measure the quantity so you can save time.

You don’t have to bend down.

You can use a grease gun to distribute Pritto Bait in different areas, which contributes to improved work efficiency

Have you ever had these problems using other products

I have to collect them everytime

The hassle of collecting cases.

I want use it there

You can’t spread it where you want.

I can’t use it because of rain

It depends on the weather, such as rain or wind.

Pritto Bait has none of these traditional problems!
